EDUCATION

Grambling State University

Bachelor of Science in Computer Science | GPA: 3.94

Grambling, LA

May 2028

Relevant Courses: Data Structures & Algorithms, Operating Systems, Database Systems, Artificial Intelligence, Computer Architecture, Discrete Structures

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C++, SQL

Frameworks/Tools: React, Next.js, Tailwind CSS, Firebase, Supabase, NeonDB, Postgres, REST APIs, Docker, AWS, Git, Clerk, Vercel

AI & Data: OpenAI API, Gemini API, LLM Applications, Prompt Engineering, Multi-Step Workflows, RAG-style Workflows, API Integration, Analytics-Driven UX

EXPERIENCE

Co-Founder & Lead Developer | Scan2Tap | Remote

May 2025 – Present

- Built and deployed an NFC/QR-powered digital networking platform, growing to **over 100 active users and 3 paying users**, by developing the product with **Next.js**, **TypeScript**, and **Supabase**
- Improved professional identity sharing by building custom profile pages, real-time contact exchange, and mobile-first user workflows into one platform for students, founders, and professionals
- Created a scalable foundation for future workflow and product expansion by designing account-based infrastructure for card fulfillment and business-facing growth

Software Engineering Fellow | Headstarter AI | Remote

Jul 2024 – Sep 2024

- Built **5 AI-powered web applications** using **Next.js**, **Firebase**, **Gemini API**, and **OpenAI API**, integrating LLM prompts and tooling into production-ready workflows in 3-week Agile sprints
- Improved application performance by **35%** and reduced user drop-off by **20%** by optimizing asynchronous data fetching, caching, and API integration at critical interaction points
- Strengthened reliability and usability of AI-powered experiences by experimenting with prompt design, workflow structuring, and API orchestration across multiple applications

IT Intern | FGFF Rapha Center | Elyria, OH

Jun 2026 – Jul 2026

- Supported day-to-day IT operations for **hundreds of staff and students** by troubleshooting devices, managing user access, and maintaining classroom and office technology across the academy center
- Improved network reliability and internal system performance by assisting with connectivity issues, software setup, and shared technology operations across **Microsoft 365**, **Google Workspace**, and Windows-based systems

PROJECTS

PostVolve | *Next.js, Supabase/Postgres, Vercel Serverless Functions*

postvolve.app

- Built an AI-powered content automation platform that generated, scheduled, and published posts across **X**, **Instagram**, and **Facebook** by implementing authenticated workflows, **cron-based scheduling**, and platform publishing logic
- Replaced fragmented manual content operations with a multi-step workflow by orchestrating different models for drafting, refinement, and publishing inside one creator-facing product

Sankpost AI | *Next.js, Gemini API, Clerk, NeonDB*

sankpost.me

- Built a SaaS platform automating branded content creation with LLM-powered generation pipelines, reducing content latency by **40%** through optimized **NeonDB** queries, smart caching, and parallelized processing
- Integrated **Clerk** authentication and role-aware presets, enabling creators to generate **50+ customized posts per session** with structured, repeatable workflows

LEADERSHIP & ACTIVITIES

AUC x Mastercard Data Challenge | **3rd Place** | Atlanta University Center Consortium

Apr 2026

- Placed **3rd out of 106 teams** and advanced to a **26-team finale** by helping develop a data-driven solution to improve inclusive growth and healthcare access in Craighead County, Arkansas
- Led data extraction, cleaning, and statistical analysis in **Python** using **linear regression** and **Pearson correlation**, while helping build **Access Terrain Network**, the team's full-stack platform solution

HackRice 15 Hackathon | *Rice University*

Sep 2025

- Placed in the **top 10% of 200+ participants** by prototyping AtmoWise in 36 hours, demonstrating rapid experimentation, clear UX, and real-world health impact

Perplexity AI Campus Ambassador | *Campus Leadership*

Aug 2025 – Present

- Organized awareness sessions and product demos to promote AI research tools, engaging student groups and driving early adoption on campus
